Maximum Flexibility and Durability in One Belt

Flexibility shouldn't mean sacrificing cutting power in your non-woven belt applications. But some belts may achieve their flexibility at the expense of life and cut. With Scotch-Brite™ Durable Flex Belts, you don't have to compromise. Get the conformability and cutting power you need to access the tightest corners, tackle small welds and blend finishes.

A Perfect Application

Whether you are blending welds, matching a finish or cleaning before welding the Scotch-Brite™ Durable Flex Belts will meet the task.

- Deburring
- Blending
- Cleaning
- Finishing

Extended Life

More demanding applications where the belt is running over the leading or trailing edges allows the belt's mineral to be "opened up". This action continues to "dress the belt" and provide extended life.

A Perfect Combination

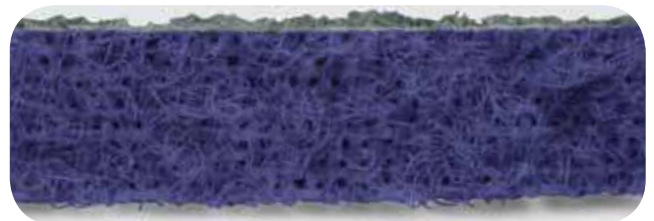

This reinforced, low-stretch belt offers good flexibility, great edge durability and reduces elongation. This makes it an ideal companion to the new 3M™ File Belt Sander. The new durable flex belt will perform well wherever the tool's eight attachment arms can reach. Its extreme flexibility will avoid belt "chunking" even on the smallest contact wheels.

Feature	Advantage	Benefit
High quality mineral coating	<ul style="list-style-type: none">• Consistent finishes• Sharper cut rate	<ul style="list-style-type: none">• Less rework• Faster production
High quality join technology	<ul style="list-style-type: none">• Less belt breakages	<ul style="list-style-type: none">• Improved safety• Less waste• Fewer belt change-overs
Increased fibre strength	<ul style="list-style-type: none">• Improved durability• Increased flexibility	<ul style="list-style-type: none">• Handles sharp edges• Faster production rates
Low stretch material	<ul style="list-style-type: none">• Less stretching	<ul style="list-style-type: none">• Lower overall costs• Stays on the machine

Also available from 3M

3M™ File Belt Sander

3M takes file belt sanding for metalworking applications to an all-new level with a wide choice of versatile attachment arms and comfort features, all designed to improve worker productivity through better control and optimised file belt performance.

Ideally suited for use with 3M™ Abrasive Belts and Scotch-Brite™ Belts for a variety of metalworking applications. Grind and blend from contact wheel or platen, finish and polish from slack of belt.

- 0.6 hp High torque, 22,000 rpm motor
- 360° rotatable belt housing and guard
- 360° rotatable handle
- 3M™ Gripping material
