

3M™ Dual Lock™ Reclosable Fasteners

Now available in Trial Bags

“Snap” is the sound of assurance when pressing together the two sides of a 3M™ Dual Lock™ Reclosable Fastener. That’s the sound of hundreds of mushroom-shaped stems interlocking with strength enough to replace unsightly mechanical fasteners and messy adhesive in many applications. Yet you can readily open and close, attach and detach for up to 1,000 snaps.

Simplified selection

With 3M™ Dual Lock™ Reclosable Fasteners Trial Bags, you have a simplified “go-to” selection of adhesives and stem count combinations proven successful for the majority of common applications in a much shorter trial length for testing.

- Five “go-to” core products to try, two options for each
- 2 strips of 25.4mm wide x 3.05m length per bag priced for economical comparative testing of different fasteners to find the best match for your job
- Length and price make sense for short run production as well
- Bag graphics differentiate contents and performance properties
- Zip closure bag with convenient hanging hole for storage of unused product

Test for stick

Choice of pressure sensitive adhesive backings gives you options for bonding the mated strips to a wide variety of materials with reliable performance indoors and out. Rubber and acrylic adhesive options for bonding metals, glass, plastics, powder coated paints, and more.

Test for snap

Select 250 to 250 or 170 to 400 stem density combinations for each adhesive option. Select them both to try four combinations from two bags.

3M™ Dual-Lock™ Reclosable Fasteners Trial Bags

Indoor/Outdoor Applications					
Product	Stock No.	Colour	Stem Count	Adhesive	Temperature Performance
TB3550	AT010587841	Black	250/250	General purpose acrylic adhesive sticks to metals, glass, medium to high surface energy plastics and paints	High
TB3551/ TB3552	AT010587858	Black	400/170	General purpose acrylic adhesive sticks to metals, glass, medium to high surface energy plastics and paints	High
TB3560	AT010587866	Clear	250/250	Clear acrylic adhesive sticks to metals, glass, and high surface energy plastics	Highest
TB3561/ TB3562	AT010587874	Clear	400/170	Clear acrylic adhesive sticks to metals, glass, and high surface energy plastics	Highest
Indoor Applications					
TB3540	AT010587825	Black	250/250	Rubber adhesive sticks to many plastics and powder coated paints, low surface energy materials	Low
TB3541/ TB3542	AT010587833	Black	400/170	Rubber adhesive sticks to many plastics and powder coated paints, low surface energy materials	Low
TB4570	AT010587908	Clear	Low profile*	Low surface energy acrylic adhesive sticks to metals, glass, many plastics and powder coated paints, medium to low surface energy materials	Low to medium
